Table of Contents

Preface

Section I: Who Health Centers Serve

- Figure 1.1 Who Health Centers Serve
- Figure 1.2 Health Center Patients Are Predominately Low Income
- Figure 1.3 Racial and Ethnic Minorities Make Up Two-Thirds of All Health Center Patients
- Figure 1.4 Most Health Center Patients are Uninsured or Publicly Insured
- Figure 1.5 Health Center Patient Mix Is Unique Among Ambulatory Care Providers
- Figure 1.6 Health Center Patients Range in Age
- Figure 1.7 Health Center Patients are Generally More Likely to Have a Chronic Illness than Patients of Office-Based Physicians

Section II: Health Center Growth

- Figure 2.1 Health Center Patients and Patient Visits Continues to Grow
- Figure 2.2 Health Center Visit Rates Are On the Rise
- Figure 2.3 The Number of Health Centers Receiving Federal Health Center Grants Has Increased Dramatically
- Figure 2.4 Growth in Health Center Patients by Insurance Status, 1999-2005
- Figure 2.5 The Number of Health Center Low Income Patients vs. Low Income Nationally, 2000-2005
- Figure 2.6 The Number of Health Center Medicaid Patients vs. Medicaid Patients Nationally, 2000-2005
- Figure 2.7 The Number of Health Center Uninsured Patients vs. Uninsured Nationally, 2000-2005
- Figure 2.8 Growth in Health Center Patients and Patients with Chronic Conditions, 2001 -2005

Section III: Access to Care

- Figure 3.1 Health Centers Provide 22% of all Uninsured Ambulatory Care Visits
- Figure 3.2 Health Center Uninsured Patients Receive More Care than the Uninsured Nationally
- Figure 3.3 Health Center Uninsured and Medicaid Patients are More Likely to have a Usual Source of Care than the U.S. Privately Insured
- Figure 3.4 Health Center Uninsured Patients are Twice as Likely to Get the Care They Need than Other Uninsured
- Figure 3.5 Percent of State Low-income, Uninsured Served by Health Centers, 2005
- Figure 3.6 Percent of State Medicaid Beneficiaries Served by Health Centers, 2005

Section IV: Preventive Services

- Figure 4.1 Health Center Patient Visits by Type of Service
- Figure 4.2 Growth in Health Center Dental & Mental Health Care, 2000-2005
- Figure 4.3 Health Center Diabetes Patients Receive More Care than Other Low Income Diabetics
- Figure 4.4 Health Center **Uninsured** Patients Receive More Health Promotion Counseling than the Uninsured Nationally
- Figure 4.5 Health Center **Medicaid** Patients Receive More Health Promotion Counseling than the Medicaid Nationally

Preface

The National Association of Community Health Centers (NACHC) is pleased to present *A Sketch of Community Health Centers*, an overview of the federal health centers program and the communities they serve. Community Health Centers began over forty years ago as part of President Lyndon B. Johnson's declared "War on Poverty." Their aim then, as it is now, is to **provide affordable, high quality and comprehensive primary care to medically underserved populations, regardless of their insurance status or ability to pay.** A growing number of health centers also provide dental, behavioral, pharmacy, and other needed supplemental services. No two health centers are alike but they all share one common purpose: to provide primary health care services that are coordinated, culturally and linguistically competent, and community-directed.

Health centers play a critical role in the health care system as the **health care home to nearly 16 million people.** Across the country health centers produce positive results for their patients and for the communities they serve. They stand as evidence that communities can improve health, reduce health disparities, and deal with a multitude of costly and significant health and social problems – including substance abuse, HIV/AIDS, mental illness, and homelessness – if they have the resources and leadership to do so.

Although the health centers program has been very successful over the years in providing vital health care services to those in need, the program faces many looming challenges. Rising costs, narrowing revenue streams, and steady increases of newly uninsured and chronically ill patients threaten health centers' ability to meet growing need. **Federal and state support is critically important** to keep pace with rising costs and escalating health care needs.

Who health centers serve, what they do, and their impressive record of accomplishment in keeping communities healthy, is represented in the following charts.

Section I: Who Health Centers Serve

Figure 1.1

Health Centers Serve...

- 1 in 9 **Medicaid** beneficiaries
- 1 in 8 **uninsured** persons, including
 - 1 in 5 **low income** uninsured
- 1 in 4 people in **poverty**
- 1 in 7 **minorities**
- 1 in 10 **rural** Americans

Figure 1.2

Health Center Patients Are Predominately Low Income

Note: Federal Poverty Level (FPL) for a family of three in 2005 was \$16,090. (See <http://aspe.hhs.gov/poverty/05poverty.shtml>.) Based on percent known. Percents may not total 100% due to rounding.

Figure 1.3

Racial and Ethnic Minorities Make Up Two-Thirds of All Health Center Patients

Note: Based on percent known. Percents may not total 100% due to rounding.

Figure 1.4

Most Health Center Patients are Uninsured or Publicly Insured

* Other public may include non-Medicaid SCHIP and state-funded insurance programs.

Note: Percents may not total 100% due to rounding.

Figure 1.5

Health Center Patient Mix Is Unique Among Ambulatory Care Providers

Notes: Other public includes non-Medicaid SCHIP and other state-funded insurance programs. Health Center data are from 2005, private physician and hospital outpatient data from 2004.

Sources: Health Center from 2005 Uniform Data System. Private Physicians from 2004 NAMCS (CDC National Center for Health Statistics, 2006). Hospital Outpatient from 2004 NHAMCS (CDC National Center for Health Statistics, 2006).

Figure 1.6

Health Center Patients Range in Age

Note: Percents may not total 100% due to rounding.

Figure 1.7

Health Center Patients are Generally More Likely to Have a Chronic Illness than Patients of Office-Based Physicians

Center for Health Services Research and Policy analysis of 2004 UDS. Office-based physician data based on 2002 National Ambulatory Medical Care Survey.

Section II: Health Center Growth

Figure 2.1

The Number of Health Center Patients and Patient Visits Continues to Grow

In Millions

Note: Excludes patients at non-Federally funded health centers, which treat an additional 1.5 million patients annually.

Figure 2.2

Health Center Visit Rates Are On the Rise

Figure 2.3

The Number of Health Centers Receiving Federal Health Center Grants Has Increased Dramatically

Figure 2.4

Growth in Health Center Patients by Insurance Status, 1999-2005

Figure 2.5

The Number of Health Center Low Income* Patients Is Growing Faster than Low Income Patients Nationally, 2000-2005

* Patients under 200% of poverty.

Sources: US Census Historical Poverty Tables. "Table 5. Percent of People By Ratio of Income to Poverty Level: 1970 to 2005." www.census.gov/hhes/www/poverty/histpov/hstpov5.html. And "Table 2. Poverty Status of People by Family Relationship, Race, and Hispanic Origin: 1959 to 2005." www.census.gov/hhes/www/poverty/histpov/hstpov2.html. Health Center Data from Uniform Data System.

Figure 2.6

The Number of Health Center Medicaid Patients Is Growing Faster than Medicaid Beneficiaries Nationally, 2000-2005

Figure 2.7

The Number of Health Center Uninsured Patients Is Growing Faster than the Uninsured Nationally, 2000-2005

Figure 2.8

Growth in Health Center Patients and Patients with Select Chronic Conditions, 2001-2005

Percent Increase

Section: III

Access to Care

Figure 3.1

Health Centers Provide 22% of All Uninsured Ambulatory Care Visits

*Includes all non-federally employed physicians outside hospitals and federally-run facilities.

** Assumes the proportion of visits for the uninsured equals the proportion of patients that are uninsured.

Sources: Private Physicians from 2004 NAMCS (CDC National Center for Health Statistics, 2006). Hospital Outpatient and ER from 2004 NHAMCS (CDC National Center for Health Statistics, 2006). Health Center from 2004 Uniform Data System.

**Section VI:
Providing Cost-Effective Care**

Figure 6.1

Compared to Medicaid Patients Treated Elsewhere, Health Center Medicaid Patients...

- Are between 11% and 22% less likely to be hospitalized for avoidable conditions
- Are 19% less likely to use the ER for avoidable conditions
- Have lower hospital admission rates, lower lengths of hospital stays, less costly admissions, and lower outpatient and other care costs

Saving 30-33% in total costs per Medicaid beneficiary

Figure 6.2

Fewer Health Center Medicaid Patients Experience Ambulatory Care Sensitive Events

Number of Ambulatory Care Sensitive (ACS) events per 100 persons

Section VII:
Health Centers' Rising Costs of
Care and Shrinking Revenues

Figure 7.1

Health Center Costs of Care Grow Slower than National Health Expenditures, 1999-2005

Note: National Health Expenditures for 2005 are projected.

Sources: Heffler S, et al. (2005) "US Health Spending Projections for 2004-2014." *Health Affairs* Web Exclusive w5-47. Smith C, et al. (2005) "Health Spending Growth Slows in 2003." *Health Affairs* 24(1):185-194. Levit K, et al. (2004) "Health Spending Rebound Continues in 2002." *Health Affairs* 23(1):147-159.

Figure 7.2

Health Center Funding Has Not Kept Up with the Costs of Care

- Annual Federal Health Center Funding per Uninsured Patient
- Annual Health Center Cost per Patient

Note: Not adjusted for inflation. Federal appropriations are for consolidated health centers under PHSA Section 330. In 2004 and 2005, uninsured patients grew faster than federal funding.

Figure 7.3

Payments from Third Party Payers Are Less than Cost

Percent of Charges Collected from Third Party Payers, 2005

Figure 7.4

Health Center Operating Margins are Negligible and Less than Hospital Operating Margins

Note: 2005 hospital data unavailable.

Source: Hospital from Healthcare Financial Management Association. "Declining Operating Margins Show US Hospitals Still Face Challenges." 2006 http://www.solucient.com/articles/0206_DataTrends.pdf. Health Center data from Uniform Data System.

Section VIII: The Importance of Medicaid

Figure 8.1

Health Centers' Revenue Sources Do Not Resemble Those of Physician Practices

Source: Center for Health Services Research and Policy Analysis with 2004 UDS (patients) and 2002 National Ambulatory Medical Care Survey (visits)

Figure 8.2

Medicaid Revenue is Directly Proportional to Medicaid Patients

Notes: Percents may not total 100% due to rounding.

Figure 8.4

Loss of Medicaid Cost-Based Payments Would Erase 15% of TOTAL Revenues

Note: By Federal law, Medicaid payment are based on cost and often through a prospective payment system. Reversing this law would erase 25-30% of Medicaid revenue for the *average* health center, or more than 15% of total revenue, through lowest payments.

Figure 8.5

Health Centers Have Moved Substantially Into Medicaid Managed Care Participation

Percent of Medicaid health center patients enrolled in managed care

Note: Managed care does not include PCCM programs.

Section IX: Federal Funding

Figure 9.1

Recent Health Center Federal Appropriations History

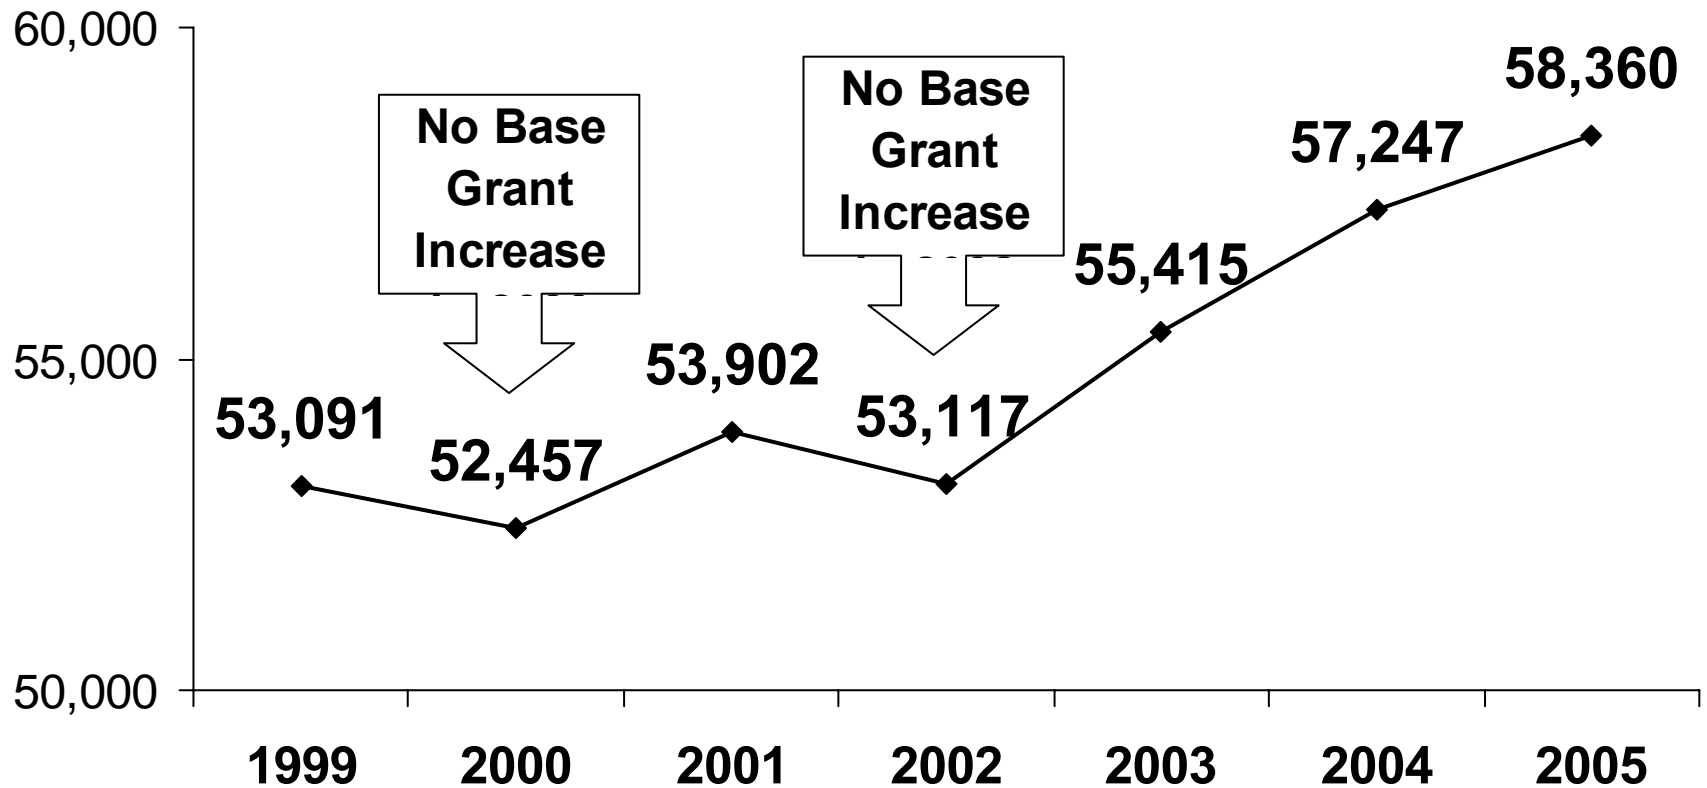

Note: Federal appropriations are for consolidated health centers under PHSA Section 330.

Figure 9.2

Failure to Adjust Federal Grants Leads to Declines in Patient Care

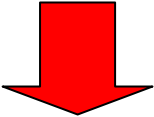

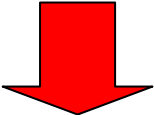

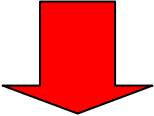

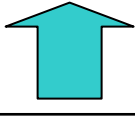

Average Number of Encounters per Health Center

Note: Federal appropriations are for consolidated health centers under PHSA Section 330.

Figure 9.3

Appropriations: Measuring Funding Results

Fiscal Year	Admin. Request	Final Approp.	Final vs. Request
2007	\$+181	\$+206/+145	???
2006	\$+304	\$+48	
2005	\$+219	\$+117	
2004	\$+122	\$+113	
2003	\$+114	\$+161	
2002	\$+124	\$+175	

Note: Federal appropriations are for consolidated health centers under PHSA Section 330.

Figure 9.4

Percent Change in National Federal Safety Net Spending and Number of Uninsured, 2001-2004*

Note: Includes funding for all safety net services. Percent change in Inflation adjusted totals. Constant 2004 Dollars
Source: Kaiser Commission on Medicaid and the Uninsured. "Growth in Uninsured Americans Outpacing Federal Spending on the Health Care Safety Net" 2005, <http://www.kff.org/uninsured/kcmu110405nr.cfm>.

Section X: Remaining Challenges

Major Challenges Facing Health Centers

- *Growth in Uninsured*: Continue to be Largest Group of Health Center Patients
- *Decline in Charity Care*: Cutbacks by Private Providers Squeezed by Managed Care
- *Loss of Medicaid and Other Public Funding*: Severe “Deficit Reduction” Cuts by States & now Congress
- *Changing Nature of Insurance Coverage*: Growing Shift to Catastrophic/High-Deductible Plans that Cover Little or no Preventive/Primary Care

Figure 10.2

Federal Grants are not Keeping Pace with Costs or Uninsured Patient Growth

Federal Grant as Percent of Uninsured Patient Costs

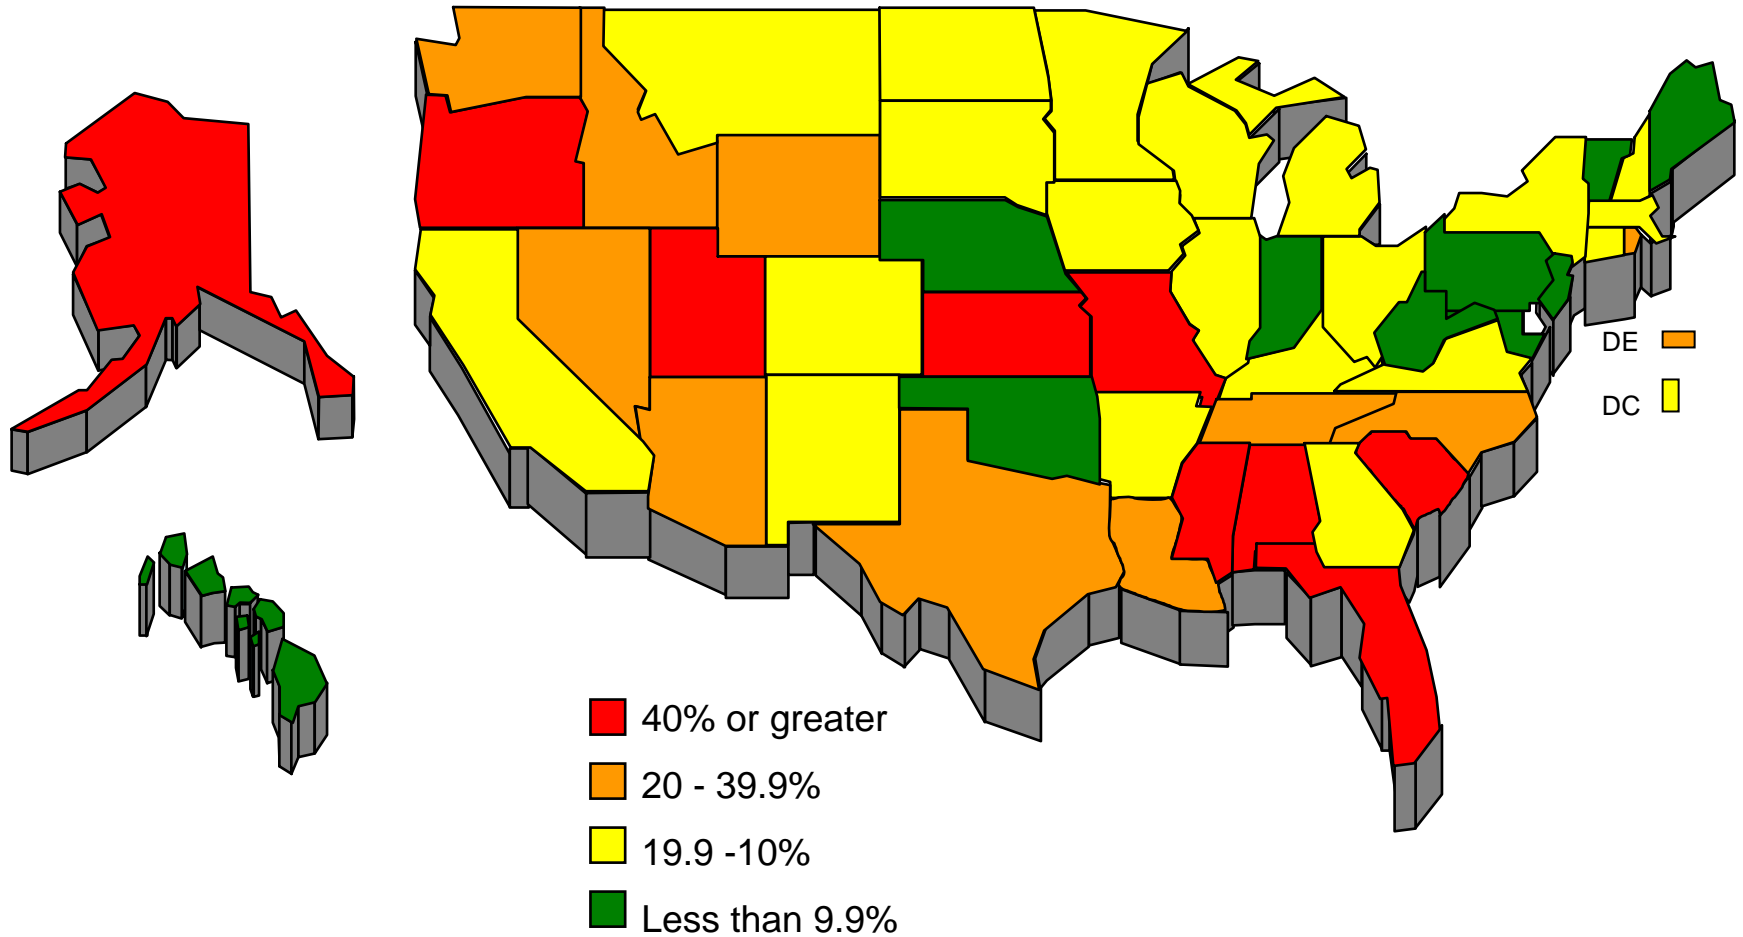

Figure 10.3

56 Million People Are Medically Disenfranchised

Percent of State Population Without Access to a Primary Care Provider, 2005

National Average = 19.4%

Note: Does not subtract health center patients as state and U.S. medically disenfranchised figures do.

Source: The Robert Graham Center. Health Services and Resource Administration (HPSA, MUA/MUP data, 2005 Uniform Data System), 2006 AMA Masterfile, Census Bureau 2005 population estimates, NACHC 2006 survey of non-federally funded health centers.

Sources and Methodology

Source: All figures, unless otherwise noted, come from NACHC, 2006. Based on Bureau of Primary Health Care, HRSA, DHHS, 2006 Uniform Data System. For more information, email research@nachc.com.

Note: This chartbook includes data from Federally-Qualified Health Centers (FQHCs) who meet federal health center grant requirements and are required to report administrative, clinical and other information to the Federal Bureau of Primary Health Care. Only FQHCs receiving federal health center grants report data. Therefore, unless otherwise noted, this chartbook does not always include data from a category of FQHCs that does not receive these funds, known as FQHC Look-Alikes. Data reflected in this chartbook may consequently underreport the volume of health care delivered by health centers. There are approximately 100 FQHC Look-Alikes across the United States.
